EXPERIENCE

Senior Software Engineer | Josys | Oct 2024 – Present

- Built a **Chrome extension** for local **Micro Frontends** development, automating MFE discovery and localhost redirection across QA, Stage, and Production environments.
- Leveraged **Chrome APIs** and **Module Federation** to improve developer efficiency and eliminate the need to run multiple servers locally.
- Developed File Governance workflows for permissions and access control, **reducing manual admin effort by 30%.**
- Engineered enterprise-grade data grids with advanced filtering, pagination, query persistence, and local caching.
- Built risk analytics dashboards using Micro Frontends architecture, **increasing user engagement by 18%** across enterprise admin workflows.
- Implemented Slack workspace and channel integrations with real-time admin notifications, **increasing adoption by 15%.**
- Improved code quality with **70%+ unit test coverage,** vulnerability fixes, and zero critical production defects across releases.
- Tech Stack: React.js, Next.js, TypeScript, Redux, Jest, RTL, MSW, Material UI, Micro Frontends

Software Engineer | Monster India (Foundit) | Jan 2023 – Aug 2024

- Migrated high-traffic recruitment and fellowship pages from Laravel to React/Next.js, contributing to a **20% increase** in job applications.
- Improved SEO, Core Web Vitals, and frontend performance using SSR optimization, code splitting, and efficient rendering strategies.
- Integrated analytics platforms including CleverTap and Freshpaint for user-event tracking, conversion monitoring, and product insights.
- Built a dynamic banner management platform, contributing to **10% revenue growth** through optimized ad placements and targeting.
- Developed a reusable npm-based global header library adopted across multiple applications and shared frontend ecosystems.
- Tech Stack: React.js, Next.js, JavaScript, TypeScript, Redux, Tailwind CSS, Responsive UI, React Query

Software Engineer | InfoEdge India Ltd (99acres) | Sept 2021 – Dec 2022

- Enhanced Locality and Zone pages for property discovery journeys, driving a **30% increase in user clicks** and **25% growth** in app visits.
- Developed scalable and reusable UI components for high-traffic real estate landing pages and property recommendation workflows.
- Optimized responsiveness, rendering performance, and frontend usability across multiple user-facing real estate discovery experiences.

PROJECTS

DevMate – Social Networking Platform | Project Link | GitHub Link

- Full-stack social networking platform with JWT authentication, **WebSocket-based chat**, scalable REST APIs, and responsive UI architecture.
- Developed scalable REST APIs, optimized MongoDB queries, and responsive UI architecture using Redux Toolkit, React Router, and Tailwind.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Redux Toolkit, React Router, Tailwind CSS, Socket.IO, JWT Authentication

NutriAI – AI-Powered Calorie Tracker | Project Link | GitHub Link

- Built an **AI-powered** nutrition tracker using the **Gemini API** to analyze food and calculate calories, protein, carbs, fats, and micronutrients.
- Developed daily food logging with **CRUD operations**, along with step and water tracking for managing daily health data.
- Built date-wise nutrition history and interactive visualizations to track calories, macronutrients, food intake, and health trends.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, React Query, Tailwind CSS, Material UI, HTML, CSS
Architecture & Performance: Micro Frontends, SSR, Component Libraries, Code Splitting, Lazy Loading, Core Web Vitals Optimization
Testing: Jest, Vitest, React Testing Library, MSW
Backend & Tools: Node.js, Express.js, MongoDB, Mongoose, REST APIs, WebSockets, Socket.IO, Git, Jira
AI-Assisted Development: GitHub Copilot, Cursor, Claude, Codex, Gemini

EDUCATION

B.Tech, Electronics & Communication Engineering — MANIT Bhopal | CGPA: 7.86 | 2017 – 2021
